QUALIFICATIONS

SSI (Structural Steel Integration)

Constructed from special thick steel, the cabinet is welded into a single piece both inside and out. This design enhances the cabinet's overall strength, making it more resistant to open and harder to destroy.

XLarge Bolts

Oversized 38 mm bolts, more in number of bolts and rust-proofed, enhance front door security, preventing break-ins and resisting bolt cutting.

CS350 Barrier Material

Incorporating CS350, a fireproof material, it offers 100 mm of added thickness for high heat resistance and superior penetration protection, safeguarding valuables against fire.

Multi Protection Door

The 170 mm steel door, with fire-retardant and anti-drilling fill, includes 85 mm puncture-proof plates and robust hinges. Fireproof backing and a front heat seal offer all-around fire and theft protection.

S&G Combination Lock

S&G combination locks hold UL certification and offer a 3-digit code with a 1,000,000 possible combinations numbers, a combination ring to prevent code theft, and a lock that resists decryption.

8 Lever Key Lock

8-lever key lock, Double Bit Lock type. The key is crafted from a special metal that is strong, durable, and difficult to counterfeit.

Automatic Relock System for Protector

The cabinet's auto-relock system, backed by safety glass and secure code, locks immediately against drilling or impact, ensuring absolute protection from unauthorized access.

Drill Protection Alloy Steel

Strengthened with a puncture-proof steel plate made from a specially developed alloy. It protects the key code mechanism Keys and all points.

High Quality Paint

The cabinet undergoes careful polishing and rust-proofing, with paint meticulously spray-dried in a car oven for a durable, uniform, and glossy finish.
